

Security Strategy and Management

ADVISORY
SERVICE

Improve corporate risk reduction with strategic security and privacy services.

Is the Security Strategy and Management Service right for your company?

- Is your security program aligned with your business strategy and processes?
- How much security risk does your business face—and how can you measure this risk and reduce it to a manageable level?
- Do you understand the regulations, laws, and best practices that govern security in your organization?
- How effective is your security program—and can you prove it to your auditors, partners, and clients?

Overview

All organizations, large and small, must demonstrate complete control and security of the data entrusted to their care. Effective control can only be achieved by taking a strategic approach and integrating security and privacy into regular business operations. Digital Defence can assist you in preparing your organization's strategy for where it needs to be now, and where it needs to be in five years.

Experienced security consultants will partner with your organization to ensure that:

- Your organization can recognize and understand security threats, and respond to the risks
- There is a balanced and effective security solution based on technology and business processes
- Costs associated with regulatory compliance have been minimized
- You have maximized the return on your security investment

Benefits of a formal Security Strategy and Program

A formal security strategy and managed program allow you to:

- Quantify and prioritize in order to identify where to invest time, money, and human resources in your organization to “get the best bang for the buck!”
- Support compliance with regulatory requirements
- Ensure that all levels of management act with due diligence in protecting corporate data resources
- Support the security and privacy components contained within a merger or acquisition
- Successfully manage security projects, including all stages of the RFP process for security products and services
- Develop a security metrics program to track your success

We ensure that your Information Security program meets the requirements for Governance, Risk, and Compliance, GRC.

Service Description

Digital Defence's Security Strategy and Management Services is designed to give your organization the quick start and structured support to develop and maintain your security program.

This customized service can include the following:

- Assist you in developing a security strategy and an implementation roadmap, allowing you to effectively plan your budget and the required resources for a 3– to 5-year period
- Alignment of the security strategy to business strategy and processes
- Business Impact Assessments, BIAs, to identify critical data management areas that must be secured
- Risk assessments, using the Canadian Federal government's Harmonized TRA Methodology, the Facilitated Risk Assessment Process, or other accepted methodology
- Security organization review, to assist in identifying governance issues, creating a security group, and integrating security into job roles and responsibilities across your organization
- Staffing augmentation, providing short– and long-term technical, management, and executive staff to provide mentoring and leadership
- Management of vendors and security projects, ensuring that you articulate your requirements during the RFP and contract processes, and the vendor delivery of the product or service
- Benchmarking of your security performance in relation to peers, competitors, internal standards, and regulatory requirements; development of a reporting methodology

About Digital Defence

Digital Defence provides complete protection against data security breaches. We provide the advisory services that align security with your business strategy and practices. Our protection services secure your data by assessing vulnerabilities and validating security controls using audits and penetration testing, or "ethical hacking". And should you suffer a security or privacy breach, we provide the 24x7 response services and expertise to minimize financial and reputational loss
